- Arabic (Fluent)
- English (v.Good)

## PROFILE

---

I am a multi-skilled professional with hands-on experience in freelance graphic design, where I worked on visual branding and creative content for different clients. I then gained strong communication and problem-solving skills through my role as a Customer Service Representative at Vodafone. With a growing passion for technology, I shifted into Web Development, learning modern programming tools and building responsive, user-friendly websites. To further enhance my analytical skills, I completed a Data Analysis course, gaining experience in data-driven decision making and insights generation.

Most recently, I worked as an Administrative Officer at Pegasus Tennis Club, where I developed strong organizational, coordination, and management skills. This diverse background allows me to combine creativity, technical knowledge, analytical thinking, effective communication, and organization to deliver high-quality digital solutions.
